Avoid Resistance with Good Management Make sure you have a Rotation Plan!

Apistan and another alternative "brand" in our market are from the same chemical family so mites that form any resistance to one are often automatically resistant to the other.

Why use Apistan/Apiguard?

- ✓ Effective and easy to use, only need two strips (Apistan) or two 50g applications (Apiguard)
- ✓ Not Soluble in Honey (Apistan)
- ✓ Safe for bees and beekeepers, Apiguard is a Thymol based treatment
- ✓ Long expiry date, 3 years from date of manufacture

Effectiveness

- ✓ A good rotation plan is to use Apistan in early spring and Apiguard in late spring, summer & autumn
- ✓ Eliminates up to 99% (Apistan) and 93% (Apiguard) of all mites

Assurance

- ✓ Apistan and Apiguard are flagship products of Vita-Europe, the world's largest dedicated honey bee health company

APIGUARD

Approved in the EU
for organic honey
production

APISTAN

Registered bee
medication in over 40
countries worldwide

AFB Diagnostic Test Kit

The Vita Europe American Foulbrood (AFB) Diagnostic Test Kit is an effective, efficient, in-the-field tool to confirm the presence of the disease. This single use kit is just like a pregnancy test kit, one line in the window tells you the test is working. Two lines means you have AFB. Inform AsureQuality, get a fire permit and burn the hive to stop the disease from spreading.

AFB can be eliminated from NZ if it is identified and those infected hives are burnt. But you don't want to burn false positives. Keep an AFB test kit handy every time you visit your apiaries. Save time and hassles.

The Ceracell Blue Top Feeder

What Makes Them The Best?

With strategic, yet elegant design, this has become the world's most popular top feeder.

The underside ribs are designed for extra heavy-duty strength and are made of 100% virgin food grade plastic.

Versatile use of the chimney for central access as well as the the corner access allows the bees to get to every last drop. Or take the corners off allow the bees to range across the dry or raw feed.

**maximise
feeding with a
simple solution**

Our Perspective

We have designed this blue top feeder for its ease of use, practicality, durability, and to create a safer way for your bees to get the feed they need.

Contact us today!

We are here to help you.

THE HOME OF INNOVATION

CERACELL **ROUND COMB** HONEY SYSTEM

Comb Honey is a great way to harvest that delicious liquid gold. Comb honey is growing in popularity in New Zealand.

It is ideal for the hobbyist and small commercial operator because it removes the need for extracting the honey. And what could be more appealing than a clean capped comb of honey!

Remember, if you're in the North or Upper South Island, to avoid tutin toxin in your honey, you must harvest your comb honey before the 31st of December each year.

WHY IT WORKS?

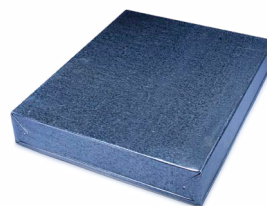

There are two main reasons why the round comb honey system is very successful. Firstly, bees prefer to fill round spaces. And, secondly we start them with beeswax foundation rather than beeswax coated plastic impressions. This gets them drawing comb faster. Simple as that.

Be sure to watch our instructional videos or read our more in-depth instructions on our website. This will make assembling and harvesting a breeze.

Introducing the New Beetle Resistant Frame (BRF)

THE HOME OF INNOVATION

Features:

- Full Depth configuration with 35mm end bars.
- The bee cells embedded in the top, sides and bottom bars assist your bees in defending their hive more easily.
- The Ceracell BRF provides little comfort or refuge for the small hive beetle, making it easier for your bees to chase them out.

Contact us today!

 info@ceracell.co.nz  www.ceracell.co.nz

 0800 CERACELL (0800 237 223)
or +64 9 274 7236

Benefits:

The Ceracell BRF is durable, noticeable more robust and stiff. This feature allows the BRF to handle various climatic environments better and can withstand the punishment of even the most powerful extractors.

Take advantage of the latest frame innovation by placing Ceracell BRFs in your hive today, because healthy bees are happy bees!

We Want Your Beeswax!

We are interested in all grades of beeswax and match our pricing to the quality and colour of your crude wax. Pricing is per kg.

We are in constant need of crude wax so feel free to call us today and speak with our customer service staff.

Please call us today at : **0800 CERACELL**
or email: **info@ceracell.co.nz**

Visit our website for a demonstration video on "How to Melt Wax" and for other tips and tricks.

Visit us at: www.ceracell.co.nz

The Ceracell Great Escape®

Say Hello to the new **Ceracell Great Escape®**

It's Black and White - there is no better bee escape/clearer board anywhere in the world!

Designed to maximise queen pheromone transfer, it has lots of cone escapes, and plenty of room underneath (while taking care of that all-important bee-space), it works! Made from food-grade polypropylene, one of the most inert substances known to man, it will last a lifetime.

We have trialled this design with our in-house beekeepers, comparing the Great Escape® to other different escape boards, and hands down this design with the cones is far and away the best.

You'll receive the cones on a sprue, so some minor assembly is required to clip the cones into place.

Priced to undercut any assembled wood escape with comparable escape avenues, and with super-fast clearance rates of bees from supers above, this is without a doubt the best value bee escape board on the planet.

Kick Start Your Queen Bees

Queen Rearing Kit Complete

Are you wanting to start your Queen Rearing journey?

Unsure of what to do or what to use?

Then this is the kit for you!

With all of the equipment you need for preparing your queen cells and instructions to go with it.

All frames are assembled with two mounting bars each to save you time and hassle in measuring and placing the bars. These have been placed specifically so you can fit our round queen cages onto the cells once they have been capped.

The Hambly Queen Timing Dial is also included to help you accurately time when you need to do what depending on the stages of the cycle the pupa are in.

Kit includes: \$59.95 ex. GST **\$68.94 incl. GST** QNRKIT

- 4 x Assembled Mahurangi wooden frames
- 2 x Mounting bars assembled per frame
- 1 x Hambly Queen Rearing Timing Dial
- 80 x Lugged Cell Cups
- 2 x Grafting tools
- Instructions

Queen Mating Starter Pack

Introducing the complete Mating Nuc system to get your Queen Bees Buzzing.

The New Ceracell Premium Wooden Mating Nuc has polystyrene sandwiched between wood panels on two sides and in the lid for greater insulation. The frames are designed to prevent them being stuck to the side so they're easy to remove to search for the Queen. And being wood construction the bees love it.

Using our Special Super with our custom mating nuc frames, you will be able to draw these frames out on an already establish hive and place them into the mating nuc with brood ready to go. This increases the chances of a successful mating nuc hive while also making it easier on you, the beekeeper.

We have also designed our own special mating nuc top feeder that allows you to constantly feed your nuc without disturbing the bees.

Pack includes: \$317.25 ex. GST **\$364.84 incl. GST** WDNPack

- 5 x Premium Wooden Mating Nucs
- 1 x Special Super for Mating Nuc frames
- 26 x Mating Nuc frames - wax coated
- 5 x Mating Nuc top feeders
- 5 x Feeder rims
- 3 x Corner cap sets (4 per set)
